

WHY WORK SO HARD TO PUMP WATER
INTO A WATER TOWER?
(*ARROW BY PUMP*)

ONCE THE WATER IS HIGH IT CAN FLOW
DOWN PIPES AND PUSH UP INTO YOUR
PIPES.

WATCH THE LEVEL OF THE WATER IN
THE TOWER, AND LOOK AT WHICH
FAUCETS THE WATER COMES OUT.

IF THE LEVEL OF WATER IN THE TOWER
IS LOWER THAN THE FAUCET, NO
WATER WILL COME OUT OF THE
FAUCET.

IF A BUILDING IS HIGHER THAN THE
FAUCET, THEN YOU NEED SOME MORE
HELP (A PUMP) TO PUSH THE WATER
OUT OF THE FAUCET.
(*FIND PIC OF SEARS TOWER*)

I'm worried about this being too wordy
